Sommario/riassunto

At a time when sustainability is on everyone's lips, this volume is one of the first to offer an overview of sustainability and communication issues - including community mobilization, information technologies, gender and social norms, mass media, interpersonal communication, and integrated communication approaches - from a development and social change perspective. Drawing on contemporary theories of communication as well as real-world examples from development projects around the world, the contributors showcase the increasing richness and versatility of communication research and practice.
