Pubbl/distr/stampa	Milano : Jaca Book, 1979
Descrizione fisica	XXVI, 315 p. : ill. ; 23 cm
Collana	Di fronte e attraverso ; 49
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910464744703321
Autore	Segev Elad
Titolo	Google and the digital divide : the bias of online knowledge / / Elad Segev
Pubbl/distr/stampa	Oxford : , : Chandos Pub., , 2010
ISBN	1-78063-178-2
Edizione	[1st edition]
Descrizione fisica	1 online resource (257 p.)
Collana	Chandos internet series
Disciplina	025.042/52
Soggetti	Search engines Internet searching Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (pages 191-218) and index.
Nota di contenuto	Power, communication and the internet -- The structure and power of search engines -- Google and the politics of online searching -- Users and uses of Google's information -- Mass media channels and the world of Google News -- Google's global mapping.
Sommario/riassunto	Aimed at information and communication professionals, scholars and students, Google and the Digital Divide: The Biases of Online

Knowledge provides invaluable insight into the significant role that search engines play in growing the digital divide between individuals, organizations, and states. With a specific focus on Google, author Elad Segev explains the concept of the digital divide and the effects that today's online environment has on knowledge bias, power, and control. Using innovative methods and research approaches, Segev compares the popular search queries in Google and Yahoo in the United States and other countries and analyzes the various biases in Google News and Google Earth. Google and the Digital Divide shows the many ways in which users manipulate Google's information across different countries, as well as dataset and classification systems, economic and political value indexes, specific search indexes, locality of use indexes, and much more. Segev presents important new social and political perspectives to illustrate the challenges brought about by search engines, and explains the resultant political, communicative, commercial, and international implications.

Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	The border environment in the nineteenth century -- The border and the Mexican revolution -- Police and waterworks on the border : aspirations to control through building -- Police and waterworks on the border : systemic flaws -- Building the border of today -- Epilogue.
Sommario/riassunto	From the boundary surveys of the 1850s to the ever-expanding fences and highway networks of the twenty-first century, <i>Border Land, Border Water</i> examines the history of the construction projects that have shaped the region where the United States and Mexico meet. Tracing the accretion of ports of entry, boundary markers, transportation networks, fences and barriers, surveillance infrastructure, and dams and other river engineering projects, C. J. Alvarez advances a broad chronological narrative that captures the full life cycle of border building. He explains how initial groundbreaking in the nineteenth century transitioned to unbridled faith in the capacity to control the movement of people, goods, and water through the use of physical structures. By the 1960s, however, the built environment of the border

began to display increasingly obvious systemic flaws. More often than not, Alvarez shows, federal agencies in both countries responded with more construction—"compensatory building" designed to mitigate unsustainable policies relating to immigration, black markets, and the natural world. *Border Land, Border Water* reframes our understanding of how the border has come to look and function as it does and is essential to current debates about the future of the US-Mexico divide.
