Industry–Environment Relation -- Chapter 20. Tourism's Contribution to
Global Environmental Change: Space, Energy, Disease, Water --
Chapter 21. Making Tourism Sustainable: The Real Challenge of Climate
Change? -- Index

Sommario/riassunto

Climate change is one of the major issues facing us today and has been described as a threat greater than terrorism. As the world's largest industry tourism both contributes to and will be dramatically affected by climate change. This is the first comprehensive book-level examination of the relationship between tourism and climate change, of interest not only to students of tourism but to policy makers and the industry who will have to respond to the challenges posed.
