	Nota di bibliografia	Includes bibliographical references (pages 183-210) and index.

Nota di contenuto

Front matter -- Preface -- Contents -- 1. Religion and Science in Discursive Perspective -- Part One: Discarded Knowledge and Its New Legitimacy in Secular Discourse -- 2. From Polemical Disjunction to New Integration: The Science of the Stars -- 3. Alchemical Quests in Modern Garb -- 4. Darwinism Turned into Religion: Monism -- 5. Merging Occultism, Philosophy, Science, and the Academic Study of Religion: The Theosophical Society -- Part Two: Academics as Religious Pioneers -- 6. The Trouble with Europe: Academic Orientalism and New Mystical Religions -- 7. In Search of the Great Goddess: How Academic Theories Generated Paganism and Witchcraft -- 8. Normalizing Shamanism: Academic Teachers as Religious Experts -- Conclusion: The Scientification of Religion -- Bibliography -- Index

Sommario/riassunto

The enigmatic relation between religion and science still presents a challenge to European societies and to ideas about what it means to be 'modern.' This book argues that European secularism, rather than pushing back religious truth claims, in fact has been religiously productive itself. The institutional establishment of new disciplines in the nineteenth century, such as religious studies, anthropology, psychology, classical studies, and the study of various religious traditions, led to a professionalization of knowledge about religion that in turn attributed new meanings to religion. This attribution of meaning resulted in the emergence of new religious identities and practices. In a dynamic that is closely linked to this discursive change, the natural sciences adopted religious and metaphysical claims and integrated them in their framework of meaning, resulting in a special form of scientific religiosity that has gained much influence in the twentieth century. Applying methods that come from historical discourse analysis, the book demonstrates that religious semantics have been reconfigured in the secular sciences. Ultimately, the scientification of religion perpetuated religious truth claims under conditions of secularism.
