| Sommario/riassunto | Building Language using LEGO® Bricks is a flexible and powerful intervention tool designed to aid children with severe receptive and expressive language disorders, often related to autism and other |

special educational needs. This practical manual equips you for setting up and adapting your own successful sessions. Downloadable resources enable you to chart progress in the following key areas: The use of receptive and expressive language; The use and understanding of challenging concepts; Joint attention; Social communication. Help children with complex needs to communicate with this unique tool, derived from the highly effective LEGO®-Based Therapy.
