Sommario/riassunto	Dementia is increasingly and widely recognised as a serious health and social challenge, in the developed world as well as in the developing world. The need therefore to design and implement dementia care services of high quality is becoming more and more vital, particularly given the likelihood of ever increasing demand in a world, which likely sees resources at best remaining at current levels. Designing and Delivering Dementia Services describes current developments in the design and configuration of dementia services. It offers an informative and detailed overview of what constitu
