

1. Record Nr.	UNINA9910812216003321
Titolo	Colloquium on neuroimaging of human brain function
Pubbl/distr/stampa	Washington, D.C., : National Academies Press, 1998
ISBN	0-309-55843-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (175 p.)
Collana	National Academy of Sciences colloquium series
Disciplina	612.8/2
Soggetti	Brain - Imaging Brain - Localization of functions
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	<p>""Untitled""; ""Contents""; ""The neuroimaging of human brain function""; ""Behind the scenes of functional brain imaging: A historical and physiological perspective""; ""Event-related functional MRI: Past, present, and future""; ""Event-related brain potentials in the study of visual selective attention""; ""Functional and structural mapping of human cerebral cortex: Solutions are in the surfaces""; ""Imaging neuroscience: Principles or maps?""; ""Spatially independent activity patterns in functional MRI data during the Stroop color-naming task""; ""Functional analysis of primary visual cortex (V1) in humans""; ""The representation of the ipsilateral visual field in human cerebral cortex""; ""On the role of selective attention in visual perception""; ""Frontoparietal cortical networks for directing attention and the eye to visual locations: Identical, independent, or overlapping neural systems?""; ""Neural components of topographical representation""; ""The neural development and organization of letter recognition: Evidence from functional neuroimaging, computational modeling, and behavioral studies""; ""The effects of practice on the functional anatomy of task performance""; ""The acquisition of skilled motor performance: Fast and slow experience-driven changes in primary motor cortex""; ""Rapidly induced auditory plasticity: The ventriloquism aftereffect""; ""Components of verbal working memory: Evidence from neuroimaging""; ""A neural system for human visual working memory""; ""Functional neuroimaging studies of encoding, priming, and explicit</p>

memory retrieval"; "Anatomy of word and sentence meaning"; "The role of left prefrontal cortex in language and memory"  
"Neuroimaging studies of word reading""Cerebral organization for language in deaf and hearing subjects: Biological constraints and effects of experience"
