

1. Record Nr.	UNINA9910812311503321
Titolo	Optical engineering of diamond // edited by Rich P. Mildren and James R. Rabeau
Pubbl/distr/stampa	Weinheim, : Wiley-VCH Verlag GmbH & Co. KGaA, 2013
ISBN	9783527648603 3527648607 9781299157286 1299157289 9783527648634 3527648631 9783527648627 3527648623
Edizione	[1st ed.]
Descrizione fisica	1 online resource (546 p.)
Altri autori (Persone)	MildrenRich P RabeauJames
Disciplina	621.36
Soggetti	Diamonds Optical films
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Title page; Copyright page; Contents; Foreword; Preface; List of Contributors; 1: Intrinsic Optical Properties of Diamond; 1.1 Transmission; 1.2 Lattice Absorption; 1.2.1 The Two-Phonon Region; 1.2.2 Absorption at Wavelengths Longer than 5 m; 1.2.3 Temperature Dependence; 1.2.4 Isotopic Content; 1.3 UV Edge Absorption; 1.4 Refractive Index; 1.4.1 Temperature Dependence of the Refractive Index; 1.5 Verdet Constant; 1.6 First-Order Raman Scattering; 1.6.1 Wavelength Dependence; 1.6.2 Raman Linewidth; 1.6.3 Temperature Dependence; 1.6.4 Isotopic Content; 1.7 Stimulated Raman Scattering 1.8 Brillouin Scattering1.9 Electronic Nonlinearity; 1.9.1 Nonlinear Refractive Index; 1.9.2 Two-Photon Absorption; Acknowledgments; References; 2: Optical Quality Diamond Grown by Chemical Vapor Deposition; 2.1 Introduction; 2.2 CVD Diamond Growth Principles; 2.2.1 Fundamentals of Growth; 2.2.2 Morphology and Texture; 2.3

Properties of Optical Quality CVD Diamond; 2.3.1 Absorption; 2.3.2 Nonoptical Wavelengths; 2.3.3 Isotopic Purity; 2.3.4 Strain-Induced Birefringence; 2.3.5 Scatter; 2.3.6 Other Properties of CVD Diamond; 2.4 Optical Applications of CVD Diamond
2.4.1 Applications of Polycrystalline Diamond 2.4.2 Applications of Single-Crystal Diamond; 2.5 Summary; 2.6 Acknowledgments; References; 3: Polishing and Shaping of Monocrystalline Diamond; 3.1 Introduction: Background and Historical Overview; 3.2 Shaping Diamond: Cleaving, Bruting, and Sawing; 3.3 Practical Aspects of Diamond Polishing; 3.3.1 Apparatus and Preparation; 3.3.2 Directional Dependence of Polishing: Wear Anisotropy; 3.4 The Science of Mechanical Polishing; 3.4.1 Wear Anisotropy; 3.4.2 Velocity Dependence; 3.4.3 Diamond Polishing Wear Debris; 3.4.4 The Polished Diamond Surface
3.4.5 Subsurface Damage 3.4.6 The Scaife: Its Surface and Preparation; 3.4.7 Atmosphere Dependence; 3.4.8 Triboluminescence; 3.4.9 Wear Mechanism; 3.5 Tribological Behavior of Diamond; 3.5.1 Slow-Speed Sliding of Diamond against Diamond; 3.5.2 Sliding of Diamond against Other Materials; 3.6 Other Polishing Methods; 3.6.1 Wear of Diamond by Other Materials; 3.6.2 Hot Metal Polishing; 3.6.3 Chemical-Mechanical Planarization; 3.7 Producing High-Quality Planar Surfaces on Diamond; 3.7.1 Cleaving; 3.7.2 Post-Mechanical Polishing Treatment; 3.7.3 Dry Chemical Etching
3.8 Nonplanar and Structured Geometries 3.9 Summary; References; 4: Refractive and Diffractive Diamond Optics; 4.1 Introduction; 4.2 Windows and Domes; 4.3 Refractive Devices; 4.3.1 Lenses; 4.3.2 Prisms; 4.3.3 Other Devices; 4.4 Diffractive Components; 4.5 Polishing; 4.6 Micromachining; 4.7 Coatings; 4.8 Applications; 4.9 Conclusions and Outlook; References; 5: Nitrogen-Vacancy Color Centers in Diamond: Properties, Synthesis, and Applications; 5.1 Introduction; 5.2 Defects in Diamond; 5.2.1 Intrinsic and Extrinsic Defects; 5.2.2 Nitrogen-Related Defects in Diamond
5.2.3 Nitrogen-Vacancy (NV) Center

Sommario/riassunto

This is the first comprehensive book on the engineering of diamond optical devices. It will give readers an up-to-date account of the properties of optical quality synthetic diamond (single crystal, nanodiamond and polycrystalline) and reviews the large and growing field of engineering of diamond-based optical devices, with applications in quantum computation, nano-imaging, high performance lasers, and biomedicine. It aims to provide scientists, engineers and physicists with a valuable resource and reference book for the design and performance of diamond-based optical devices.
