Sommario/riassunto	During her lifetime Françoise Dolto revolutionized the psychoanalytic understanding of childhood. As an early pioneer, she emphasized that the child is to be recognized from birth as a person. As a gifted and innovative clinician, Dolto developed her ideas about the unconscious image of the body. An image that is unique to each individual and

linked to both a person's history and narcissism, rather than their physicality. It is the symbolic incarnation of a person's desires. Dolto began her career as a member of the IPA, was admired by Winnicott, close to Lacan and influenced by Morgenstern.
