Schneider -- Brain tumors, systemic lupus erythematosus, HIV/AIDS, and Wilson's disease / Constantine G. Lyketsos -- Antidepressants / John R. Lipsey -- Stimulants and dopamine augmenters / Chiadi U. Onyike -- Neuroleptics / Deirdre Johnston -- Mood stabilizers / Susan W. Lehmann -- Anxiolytics / Deirdre Johnston -- Cholinesterase inhibitors and memantine /

Constantine G. Lyketsos -- Electroconvulsive therapy / John R. Lipsey -- Psychotherapy / Susan W. Lehmann -- Nonpharmacologic interventions other than psychotherapy / Constantine G. Lyketsos.

Sommario/riassunto

Targeted at neurologists, psychiatrists, and other physicians who care for patients with the most common neurologic diseases ranging from Alzheimer's to stroke to headaches to multiple sclerosis to epilepsy, this book provides a practical approach to the evaluation and treatment of the psychiatric conditions that affect the vast majority of these patients and are as disabling as the neurologic symptoms. Drawing from the collective wisdom and clinical expertise of the faculty of the Johns Hopkins Division of Geriatric Psychiatry and Neuropsychiatry, one of the largest and most well known faculties in this specialized field, the book provides a wealth of useful clinical information for physicians who care for these patients.
