

1. Record Nr.	UNINA9910812383303321
Titolo	Advances in pulmonary neuroendocrine tumor management // editor, Kjell Oberg
Pubbl/distr/stampa	London, England : , : Future Medicine Ltd., , [2013] ©2013
ISBN	1-78084-162-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (101 p.)
Disciplina	616.99424
Soggetti	Neuroendocrine tumors - Treatment Lungs - Tumors - Treatment
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Title page; Copyright page; Contents; Foreword. Advances in pulmonary neuroendocrine tumor management; 1. Classification; 2. Molecular imaging & peptide receptor radionuclide therapy; 3. Biotherapy: somatostatin analogs and IFN-; 4. Typical and atypical bronchial carcinoid tumors; 5. Small-cell lung cancer and large-cell neuroendocrine tumors of the lung; 6. Thymic neuroendocrine tumors; 7. Algorithm for management of bronchopulmonary neuroendocrine tumors; Index
Sommario/riassunto	Pulmonary neuroendocrine tumors (NETs) account for approximately one-quarter of all malignant lung cancers, the vast majority being represented by small-cell lung carcinoma. This thorough overview of this challenging field from international experts explores the various existing and emerging treatment options across the NET spectrum together with approaches to diagnosis and monitoring of disease.
