

1. Record Nr.	UNINA9910346686203321
Autore	Debnath Samir
Titolo	Berry Crop Production and Protection
Pubbl/distr/stampa	MDPI - Multidisciplinary Digital Publishing Institute, 2019
ISBN	3-03921-095-5
Descrizione fisica	1 electronic resource (158 p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>Berry crops include, but are not limited to, the genera: <i>Fragaria</i> (strawberry, Rosaceae), <i>Ribes</i> (currant and gooseberry, Grossulariaceae), <i>Rubus</i> (brambles: raspberry and blackberry; Rosaceae), <i>Vaccinium</i> (blueberry, cranberry and lingonberry; Ericaceae) and <i>Vitis</i> (grapes, Vitaceae). The significant role of these fruits in maintaining human health has increased their popularity and production, dramatically, across the world. This Special Issue of <i>Agronomy</i> covers berry crops in the areas of breeding, genetics, germplasm, production systems, propagation, plant and soil nutrition, pest and disease management, postharvest, health benefits, marketing and economics and other related areas. The aim will be to bring together a collection of valuable articles that will serve as a foundation of innovative ideas for production and protection of health-promoting berry crops in changed environment.</p>

Livello bibliografico	Monografia
Note generali	"November 2009".
Nota di contenuto	Intro -- Contents -- I. Introduction -- II. Asset Price Busts in the Modern Era -- A. Defining Asset Price Busts -- B. Patterns in macroeconomic Variables in the Run-Up to a Bust -- III. How Good are These Variables as Indicators of Asset Price Busts? -- IV. Macroeconomic Patterns Ahead of the Current Crisis -- A. The Role of Monetary Policy -- V. Conclusion -- References -- Data Appendix -- Tables -- 1. House Price and Stock Price Busts from 1970 to 2008 -- 2. Classification of Observations Based on variable Thresholds -- 3. Percentiles Used as Thresholds for Alarms -- 4. Marginal Probabilities Based on Probit Regressions -- Figures -- 1. Asset Price Busts -- 2. Selected Macroeconomic Variables Before and During House Price Busts -- 3. Selected Macroeconomic Variables Before and During Stock Price Busts -- 4. Selected Macroeconomic Variables Before and During High-Cost and Other House Price Busts, 1985-2008 -- 5. The Probability of

an Asset Price Bust -- 6. The Failure of the Indicators to Predict an Asset Price Bust -- 7. Recent Developments in House and Stock Prices -- 8. Warning Signs for Recent House Price Busts -- 9. Macroeconomic Patterns Underlying Recent House Price Booms -- 10. Recent House Price Booms and Household Balance Sheets -- 11. Monetary Conditions Leading up to the Current Crisis -- 12. Inflation and Output for Advanced Economies in Recent Years -- 13. House Prices and Monetary Conditions -- 14. Stock Prices and Monetary Conditions -- 15. Growth Rate of Nominal Credit Relative to GDP and Real Policy Rates -- 16. Selected Macroeconomic Variables Before and During House Price Busts -- 17. Selected Macroeconomic Variables Before and During Stock Price Busts.

Sommario/riassunto

We find that inflation, output and the stance of monetary policy do not typically display unusual behavior ahead of asset price busts. By contrast, credit, shares of investment in GDP, current account deficits, and asset prices typically rise, providing useful, if not perfect, leading indicators of asset price busts. These patterns could also be observed in the build-up to the current crisis. Monetary policy was not the main, systematic cause of the current crisis. But, with inflation typically under control, central banks effectively accommodated these growing imbalances, raising the risk of damaging busts.
