

1. Record Nr.	UNINA9910812495903321
Titolo	Margins : a research initiative for interdisciplinary studies of processes attending lithospheric extension and convergence : proceedings of a workshop sponsored by the National Research Council, Beckman Center, Irvine, California, November 20-23, 1988 // Continental Margins Committee, Ocean Studies Board, Commission on Physical Sciences, Mathematics, and Resources, National Research Council
Pubbl/distr/stampa	Washington, D.C., : National Academy Press, 1989
ISBN	1-280-21277-2 9786610212774 0-309-54327-4 0-585-14400-1
Edizione	[1st ed.]
Descrizione fisica	1 online resource (295 pages) : illustrations
Disciplina	551.1/36
Soggetti	Plate tectonics Continental margins Earth Crust Congresses
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Margins: A Research Initiative for Interdisciplinary Studies of Processes Attending Lithospheric Extension and Convergence -- Copyright -- PREFACE -- Contents -- PART I REPORT OF THE CONTINENTAL MARGINS WORKSHOP -- Executive Summary -- OVERVIEW -- Mechanics of Faulting -- Fluid Flow -- Growth and Modification of Continental Crust -- Depositional Systems at the Edge of the Continents -- DEVELOPMENT OF A SCIENCE PLAN -- Formation of a Margins Initiative Committee -- Organization of Workshops -- 1 Introduction -- IMPETUS FOR THE WORKSHOP -- ORGANIZATION AND SUPPORT OF THE WORKSHOP -- Passive Margins -- Active Margins -- CHARGES TO THE WORKING GROUPS -- 2 Results of the Workshop -- MARGIN PROCESSES: A NEW RATIONALE FOR RESEARCH INTO LITHOSPHERIC CONVERGENCE AND DIVERGENCE -- Divergent Margins -- Convergent And Translational Margins -- Deformational Processes

-- Magmatic Processes -- Fluid Flow -- Sedimentation Processes --
Mantle Dynamics -- FUTURE DIRECTIONS FOR RESEARCH ON MARGIN
PROCESSES: REQUIREMENTS FOR SUCCESS -- Communication and
Collaboration Among Scientists -- Databases -- Computational
Facilities -- Scientific Drilling -- Seismic Facilities -- Chemical
Analytical Facilities -- Theoretical and Computational Studies -- 3
Components of A Margins Initiative -- A NEW APPROACH FOR MARGINS
RESEARCH -- A MARGINS INITIATIVE COMMITTEE -- PLANNING
WORKSHOPS -- DRAFTING A SCIENTIFIC PLAN -- PART II REPORTS OF
THE WORKING GROUPS -- 4 Passive Margins: Group 1 Mechanics of
Rifting and Associated Magmatism -- PREAMBLE -- Surface Geological
Mapping in the Basin and Range Province -- Deep Seismic Reflection
Profiling On Extended Continental Lithosphere and Laboratory
Measurements of Lithospheric Materials -- Shallow Marine Reflection
Profiling and Surface Geologic Studies of the East African Rift System.
Marine Geophysical Studies of the Deep Structure of Passive Margins in
the Central and North Atlantic Oceans -- Theoretical Modeling of
Subsidence and Thermal History In Sedimentary Basins and the
Lithosphere a Continuum -- Isotope And Trace Element Analysis of Rift
Volcanics and Xenoliths -- THE SINGLE MOST IMPORTANT SCIENTIFIC
OBJECTIVE -- NEEDED STUDIES -- Determine the Distribution of Three-
Dimensional Strain in the Lithosphere -- Low-Angle Normal Faulting in
the Crust -- The Interplay Between Extension and the Rheological
Stratification of the Lithosphere -- Structural and Magmatic
Segmentation of Rifts in the Context of the Mechanics of Rifting and
Heterogeneities of the Lithosphere -- Determine the Causes of
Compositional, Temporal, and Spatial Variations in Magmatism and
Degassing -- Vertical and Lateral Magmatic Transport -- The
Transition From Rift to Ridge Magmatism -- Mobility of the Crust-
Mantle Boundary During Rifting -- Determine the Cause for Spatial and
Temporal Variability of Uplift and Subsidence in Rift Systems -- The
Timing and Rate of Vertical Motion -- Isostasy During and After Rifting
-- Uplift and Subsidence as an Independent Constraint on the Overall
Structure of the Rift -- The Interplay Between Rift Structure,
Topography, Erosion, and Deposition -- 5 Passive Margins: Group 2
Rift and Passive Margin Basins- The Sedimentary Record -- PREAMBLE
-- BACKGROUND -- Scientific -- Economic -- Biospheric -- THE
SINGLE MOST IMPORTANT SCIENTIFIC OBJECTIVE -- The Specific
Processes Involved -- Origin of Stratification -- Origin of Stratigraphic
Sequences -- Stratigraphic Documentation of Global Synergisms --
Improved Temporal Resolution -- Critical Problems -- Stratigraphic
Problems -- Processes -- Events -- NEEDED STUDIES -- Kinds of
Information -- Data Collection Methods and Tools -- Laboratory,
Theoretical, and Numerical Developments.
Dynamical Sediment Flux and Accumulation Models -- Backstripping
Models -- Seismic Expression of Stratal Geometries -- Measurement
Capabilities Needed -- STRATEGIES REQUIRED TO ACHIEVE THE GOALS
-- 6 Passive Margins Group 3 Divergent Continental Margins-Post-
Rifting Internal Processes -- SUMMARY -- BACKGROUND -- THE
SINGLE MOST IMPORTANT SCIENTIFIC OBJECTIVE -- Processes Involved
-- Critical Problems -- NEEDED STUDIES -- Obtaining Snapshots of
Fluid and Chemical Fluxes in Divergent Margin Basins -- Fluid Seeps on
Flanks and Toes of Divergent Margins -- Geopressured Fluid Flow --
Heat Flow -- Determining the Cumulative Effects of Fluid and Chemical
Fluxes in Divergent Margin Basins -- Diagenetic Cements -- Gas
Hydrates -- Hydrocarbon Maturation -- Developing Integrated Models
to Simulate Fluid-Chemical Processes in Divergent Margins -- Local
Models -- The Integrated Process Model -- STRATEGY REQUIRED TO

ACHIEVE GOALS -- BROADER IMPLICATIONS -- Selected Bibliography --
7 Active Margins: Group 1 Dynamics of Short-Term Deformation At
Active Margins -- THE SINGLE MOST IMPORTANT SCIENTIFIC OBJECTIVE
-- THREE MAJOR AREAS FOR INVESTIGATION -- What Controls Aseismic
Deformation and the Recurrence Characteristics and Locations of
Catastrophic Earthquakes? -- What Controls Accretion, Nonaccretion,
and Erosion of the Upper Plate at Convergent Margins? -- What
Determines the Partitioning of Deformation In Plate-Boundary Zones?
-- NEEDED STUDIES -- Geometry of the Downgoing Plate -- Structures,
Geodetics, and Seismicity of Subduction Margins -- Numerical
Modeling -- Enhanced Geophysical Instrumentation -- Submarine and
Rapidly Deployed Geodetics -- Ocean-Bottom Seismometers --
Measurements of Stress and Deep Structures -- Rheological Studies --
8 Active Margins: Group 2 Geologic Evolution of Active Continental
Margins.

THE SINGLE MOST IMPORTANT SCIENTIFIC OBJECTIVE -- How are
Terranes Formed, Moved, and Accreted? -- What are the Consequences
of Changes in Plate Motion for Active Plate Boundaries? -- What
Controls Vertical Motions in the Forearc Region of Convergent Margins?
-- Specific Problems -- What Controls Arc Rifting and the Development
of Backarc Basins? -- What Causes the Initiation of Subduction? --
NEEDED STUDIES -- Mapping, Paleomagnetism, Petrology, and
Geochemistry of Terranes -- Cross-Disciplinary Studies of Rifting and
Backarc Basins -- Geodetic and Geomorphic Studies of Propagating
Subduction -- 9 Active Margins: Group 3 Mass and Chemical Transfer
-- INTRODUCTION -- Melting Pot of the Earth: Crustal Formation and
Modification at Active Margins -- CRITICAL PROBLEMS -- Chemical
Variability of Input from the Subducting Plate -- Mass Transfer Across
Plate Boundaries -- Mantle Wedge Processes -- Crustal Processes --
Chemical Variability of the Output: Geochemistry of Magmas and Fluids
at Active Margins -- Episodicity of Volcanism: Reflection of a Nonlinear
System -- NEEDED STUDIES -- 10 Supplementary Note on Rock
Mechanics Problems at Active Margins -- LABORATORY EXPERIMENTS
-- CONDITIONS IN CONTINENTAL MARGINS -- PARADOX OF STRESS
MAGNITUDES ON FAULTS -- PART III BACKGROUND PAPERS -- Contents
-- ACTIVE CONTINENTAL MARGINS MECHANICS OF PLATE MOTION --
MECHANICS, KINEMATICS, AND DEFORMATION MODES AT
CONVERGENT MARGINS -- Introduction -- Selected Problems -- Future
Research Directions -- References -- Figure Captions -- DRIVING
FORCES: SLAB SUBDUCTION AND MANTLE CONVECTION -- Introduction
-- State of Current Knowledge -- Empirical -- Observations -- Models
-- Key Questions -- New Observations, Experiments, and Models --
Seismology -- Geodesy -- Mineral Physics -- Numerical Modeling --
Bibliography -- FIGURE CAPTIONS.

ACTIVE CONTINENTAL MARGINS GEOLOGIC EVOLUTION OF ACTIVE
CONTINENTAL MARGINS -- INITIATION OF SUBDUCTION --
Introduction -- State of Knowledge -- Outstanding Questions --
Targets for Future Research -- 1. Conventional Oceanographic Studies
-- 2. On-land studies of ophiolites and other emergent forearcs -- 3.
Special Projects -- References -- INTRA-OCEANIC CONVERGENT
MARGINS -- Introduction -- Magmatism -- Structure and Stratigraphy
-- Fluids and Thermal Regime -- Methods for Studying These Margins
-- Selected References -- COLLISION OF SEAMOUNTS, RIDGES, AND
CONTINENTAL FRAGMENTS: THEIR EFFECTS ON CONVERGENT MARGINS
-- Some Tectonic Processes Accompanying Collision -- Questions --
References -- Figure Caption -- ACTIVE CONTINENTAL MARGINS MASS
AND CHEMICAL TRANSFER -- MASS FLUX AND CRUSTAL EVOLUTION AT
CONVERGENT MARGINS -- I. Introduction: the Present Crust-Mantle

System -- II. Mass Flux at Convergent Margins -- a) Global Overview --
b) Input-Output Analysis Of Subduction Process (S-Process) Crustal
Recycling -- c) Regional Variability -- III. Crustal Evolution -- a)
Coupling of Mantle-Crust Evolution -- b) Crustal Additions, Crustal
Composition, and Lower Crustal Delamination -- Outstanding
Questions -- a) Processes of Mass Transfer -- b) Mass Flux and the
Geological Record -- c) Relation of Mantle Heterogeneity to Plate
Convergence -- References -- PASSIVE CONTINENTAL MARGINS
MECHANICS OF RIFTING OF THE LITHOSPHERE -- COMMENTS ON
RIFTING AND PASSIVE MARGIN EVOLUTION IN LIGHT OF SOME RECENT
STUDIES -- References -- IGNEOUS PROCESSES AND THE EVOLUTION
OF RIFTED CONTINENTAL MARGINS -- Some Suggestions for Future
Research -- References -- PASSIVE CONTINENTAL MARGINS RIFT AND
PASSIVE MARGIN BASINS - THE SEDIMENTARY RECORD --
INVESTIGATING THE SEDIMENTARY RECORD: SEQUENCE
STRATIGRAPHY-THE RECORD OF TECTONISM AND THE GLOBAL OCEAN
ENVIRONMENT.
Introduction.
