| Sommario/riassunto | Today in the age of technology, contemporary researchers from the fields of philosophy, cognitive science, neurobiology, and artificial intelligence ask many questions about the nature of the mind and body, originating in ancient Greek philosophy. Among those, are also questions about the relationship between humans and machines, and the implications this carries for solving traditional problems within philosophy. In this book, the term 'machine' is taken to refer to every system which, in th... |
