

1. Record Nr.	UNINA9910812560903321
Titolo	Abelian groups and noncommutative rings : a collection of papers in memory of Robert B. Warfield, Jr. // L. Fuchs [and three others], editors
Pubbl/distr/stampa	Providence, Rhode Island : , : American Mathematical Society, , [1992] ©1992
ISBN	0-8218-7718-6 0-8218-5142-X
Descrizione fisica	1 online resource (408 p.)
Collana	Contemporary mathematics, , 0271-4132 ; ; 130 , 0271-4132
Disciplina	512/.2
Soggetti	Abelian groups Noncommutative rings
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Contents -- Preface -- Robert Breckenridge Warfield, Jr. -- The abelian group papers of Robert B. Warfield, Jr. -- Warfield in ring theory -- Endomorphism rings, tensor products and fuchs' problem 47 -- Endomorphism rings of p-groups having length cofinal with I? -- Skew differential operators on commutative rings -- Isomorphisms from top to bottom -- Power intersection in Noetherian P.I. rings -- Colimits of functors and grothendieck groups of infinite group algebras -- Modules over hereditary rings -- An explicit description of all simple $k[[x]]$ -modules -- Countable Butler groups -- An Unbounded localizable clique -- The Auslander-Reiten translate -- On the abundance of N_1 -separable modules -- Graded BGG algebras -- Krull and global dimension of certain iterated skew polynomial rings -- Prime factor series of modules over a Noetherian algebra -- Enveloping algebras of solvable Lie superalgebras are catenary -- Prime and primitive ideals in enveloping algebras of solvable Lie superalgebras -- Endomorphism algebras of not necessarily cotorsion-free modules -- Direct sum decompositions of vector spaces equipped with linear and bilinear forms -- Maximal orders and deformations of modular group algebras -- Butler groups and Bext: A constructive view -- Goldie-prime serial rings -- A Connes spectrum for Hopf algebras -- Minimal regular rings -- The Loewy length of the

Jacobson radical of a bounded endomorphism ring -- Warfield duality and irreducible groups -- The constructive theory of countably generated Warfield modules -- A note on generic division algebras.
