Sommario/riassunto

Serious study of social and political life must attend to gender as a category of analysis. Gendering the Nation-State explores the gendered dimensions of a fundamental organizational unit in social and political science: the nation-state. Yasmeen Abu-Laban has drawn together work by both high-profile and emerging scholars to rescue gender from the margins of theoretical discussions on the nation, the state, public policy, and citizenship. Contributors bring the insights of feminist analysis to bear on three relationships central to popular and policy discussions in contemporary Canada and beyond: gender and nation, gender and state processes, and gender and citizenship. Gendering the Nation-State employs a comparative framework and builds on three decades of multidisciplinary work. Nuanced and wide-ranging, the collection crosses and challenges physical, theoretical, and disciplinary borders. It will appeal to scholars in political science, gender studies, and sociology.
