Sommario/riassunto	During the past thirty years, international trade agreements have focused increasingly on areas of provincial jurisdiction. In The Provinces and Canadian Foreign Trade Policy, Kukuca argues that Canadian provinces have maintained a level of autonomy in response to

these developments, sometimes even influencing Canada's global trade relations and the evolution of international norms and standards. The first comprehensive review of provincial foreign trade policy in Canada, the book highlights the convergence of debates related to federalism, Canadian foreign policy, and the global political economy as they are played out in the negotiation and implementation of international trade agreements. It will be of interest to students and practitioners of political science, public policy, and economics.
