Sommario/riassunto	In the developing world, the choices available to couples for fertility treatments in the 21st century are wider than ever before. This is a time when most types of infertility can be treated by modern 'test-tube' methods, yet reproduction itself has become inextricably bound with social and political trends - declining birth rates, delayed first pregnancy, childbirth beyond the age of 40, the state funding of infertility treatment - fertility treatment is a hot topic, high on the agenda of politicians in their efforts to reverse declining national fertility rates. The range of new technologies
