

1. Record Nr.	UNINA9910812663103321
Titolo	Pulmonary arterial hypertension [[electronic resource]] : focusing on a future : enhancing and extending life // edited by J. Antel, M.B. Hesselink and R.T. Schermuly
Pubbl/distr/stampa	Amsterdam, : IOS Press, 2010
ISBN	6612880457 1-282-88045-4 9786612880452 1-60750-609-2
Descrizione fisica	1 online resource (116 p.)
Collana	Solvay Pharmaceuticals Conferences ; ; v. 10
Altri autori (Persone)	AntelJ (Jochen) HesselinkM. B SchermulyR. T
Disciplina	616.1 616.1/32
Soggetti	Pulmonary hypertension
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Title page; Preface; List of Contributors; Contents; Conference Preface; Surgical Treatment of Pulmonary Arterial Hypertension; Pulmonary Arterial Hypertension Associated with Systemic Sclerosis: A Need for a More Focused Approach; Established and New Therapies for Hypoxia and Non-Hypoxia-Related Pulmonary Hypertension; Novel Anti-Proliferative Therapies in Pulmonary Hypertension; What Animal Models Tell Us About Treatments for Pulmonary Hypertension; Therapeutic Potential for Dual Inhibition of Endothelin Converting Enzyme and Neutral Endopeptidase in Pulmonary Arterial Hypertension Pulmonary Vascular Disease in the Newborn - From Pathophysiology to Therapeutic StrategiesFrom Concept to Therapy - Alternative Route of Drug Application: Inhalation; Author Index
Sommario/riassunto	Pulmonary hypertension is a fatal lung and heart disease. It is characterized by shortness of breath, fatigue and fainting. It is exacerbated by an increase of the pressure in the lung vasculature through exercise, leading to progressive worsening of hemodynamics,

right ventricular hypertrophy, right heart insufficiency and finally right heart failure. This book focuses on pulmonary arterial hypertension, a rare and progressive subgroup of pulmonary hypertension, which is today incurable and terminally fatal. Classification of pulmonary arterial hypertension, its pathology, and strategies for
