

1. Record Nr.	UNINA9910812823503321
Autore	Liatkher V. M (Viktor Mikhailovich)
Titolo	Seismic loads // Victor M. Lyatkher
Pubbl/distr/stampa	Hoboken, New Jersey ; ; Salem, Massachusetts : , : Scrivener Publishing : , : Wiley, , 2016 ©2016
ISBN	1-118-94626-X 1-118-94628-6 1-118-94625-1
Descrizione fisica	1 online resource (371 p.)
Disciplina	624.1/762
Soggetti	Earthquake engineering Axial loads
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Half Title page; Title page; Copyright page; Preface; Chapter 1: Statement of the Problem; 1.1 General Scheme of Estimation of Seismic Stability; 1.2 Seismic Hazard; 1.3 Variation of Seismic Hazard; 1.4 Seismic Loads; Chapter 2: The Definition of Seismic Actions; 2.1 The Probability of Loads During the Earthquake of a Given Intensity; 2.2 Recognition of Earthquake Foci; 2.3 The Calculation of Seism Caused by Movement in the Earthquake Focus; 2.4 Physics of Focus and Control of Seismicity; 2.5 Seismic Forces for a Fixed Position and Energy of the Earthquake Source Chapter 3: The Influence of Topography and Soil Conditions. Secondary Processes3.1 Influence of the Canyons; 3.2 Dynamics of Water-Saturated Soil Equivalent Single-Phase Environment; 3.3 Dynamics of Water-Saturated Soil as Multiphase Medium; 3.4 The Real Estimates of the Property of Soils; 3.5 Landslides and Mudflows; 3.6 Waves on the Water; Chapter 4: Example of Determination of Seismic Loads on the Object in an Area of High Seismicity; 4.1 Assessment of Seismotectonics and Choice of Calculation of Seismicity; 4.2 The Parameters of Impacts; 4.3 Selection of Unique 4.4 Numerical Models of the Focus4.5 The Influence of the Shape of the

Canyon; Chapter 5: Examples of Determination of Seismic Effects on Objects in Areas of Low Seismicity; 5.1 Preliminary Analysis; 5.2 Assessment of Seismic Risk on Seismological Data; 5.3 Tectonic Structure of the Area; 5.4 Recognition of Seismically Active Nodes' Morphostructure; 5.5 The Types of Computational Seismic Effects; 5.6 Analog Modeling of Seismic Effects; 5.7 Mathematical Modeling of Seismic Effects; Chapter 6: Stability of Structures During Earthquakes; 6.1 Stability of Concrete Dams 6.2 Vibration and Strength Reserves of the High Dams 6.3 The Reliability of Groundwater Dams; 6.4 The Stability of Underground Structures; 6.5 Seismic Effects Caused by Missing Floods Through the Waterworks; Conclusion; References; Index
