Note generali Nota di bibliografia Includes bibliographical references and index. Nota di contenuto section 1. Foodborne disease: epidemiology and disease burden -section 2. Foodborne infections: bacterial -- section 3. Foodborne infections: viral -- section 4. Foodborne infections: parasites and others -- section 5. Intoxications -- section 6. Policy and prevention of foodborne diseases. Sommario/riassunto The accelerated globalization of the food supply, coupled with toughening government standards, is putting global food production. distribution, and retail industries under a high-intensity spotlight. High-publicity cases about foodborne illnesses over recent years have heightened public awareness of food safety issues, and momentum has been building to find new ways to detect and identify foodborne pathogens and eliminate food-related infections and intoxications. This extensively revised 4e covers how the incidence and impact of

foodborne diseases is determined, foodborne intoxications with
