

1. Record Nr.	UNINA9910812866103321
Titolo	On interpreting construction schemas : from action and motion to transitivity and causality // edited by Nicole Delbecque. Bert Cornillie
Pubbl/distr/stampa	Berlin ; ; New York, : Mouton de Gruyter, c2007
ISBN	1-282-19692-8 9786612196928 3-11-020784-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (380 p.)
Collana	Trends in linguistics. Studies and monographs ; ; 198
Classificazione	ET 665
Altri autori (Persone)	DelbecqueNicole CornillieBert <1975->
Disciplina	415/.6
Soggetti	Grammar, Comparative and general - Verb phrase
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Frontmatter -- Table of contents -- Introduction -- A usage-based approach to prototypical transitivity -- Transitivity and referentiality in Spanish and Rumanian -- Transitive verbs with non-accusative alternation in Hebrew: Cross-language comparison with English, German and Spanish -- Unsubcategorized objects in English resultative constructions -- Complex predicates in Basque -- An adversative passive in English: in search of origins -- Verbs of letting: Some cognitive and historical aspects -- Syntactic and semantic integration in the Spanish causative-reflexive construction -- Soft causatives in Spanish -- Two causal alternatives: carry vs. push type constructions in English -- Grammar of "manner of motion" verbs in English and Spanish: between lexicon and syntax -- On the nature of lexicalization patterns: a crosslinguistic inquiry -- The semantics of space: A study of the prefix proin Serbian -- Backmatter
Sommario/riassunto	This volume addresses the constructional variability with transitive and causative verbs from the point of view of their respective action and motion patterns. Drawing on the theoretical advances registered in cognitive approaches to language (Cognitive Grammar, Construction Grammar and space semantics), the papers substantiate new interpretations and adduce empirical evidence from various languages

to refine or adjust existing analyses of transitivity and causation. The different contributions all address the crucial question of how concrete and abstract notions of human behavior drive linguistic expressions. Cognitive linguists consider that linguistic competence functions in terms of complex conceptual units: the native speaker knows and manipulates conceptual blocks without paying further attention to their constitutive parts or their internal organization. However, as this volume illustrates, the role of the constitutive parts and their internal organization cannot simply be reduced to zero. A multidimensional approach to construction schemas is at stake. That is, the speaker applies proper embodied subroutines to build a coherent meaning, but the construction schemas are also rooted in the linguistic patterns the speaker and hearer are familiar with. The volume is primarily intended for scholars working within cognitive-semantic research at large. Given its theoretical and applied character (in the sense of giving empirical evidence for specific problems in the grammar), the volume will also be of great interest to anyone concerned with syntactic processes, construction grammar or with the cognitive structure of discourse. The descriptive and theoretical insights indeed dwell on areas that are currently dealt with in modern linguistics.
