Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [281]-285).
Nota di contenuto	Cover; Preface; Contents; Chapter I Introduction; Chapter II The Ecosystem; Chapter III Productivity; Chapter IV Bioenergetics; Chapter V Bio-Geo Cycles of Chemicals; Chapter VI Populations; Chapter VII Community; Chapter VIII Biomes; Chapter IX Pollution; Chapter X Problems and Solutions; Bibliography
Sommario/riassunto	Today, as never before, the application of knowledge of Ecology in our everyday life has become of paramount importance. Our very survival depends on these. Most of us are however blissfully unaware of the looming environmental catastrophe, though, the cliché words like ecosystem, sustainable development, and ecotourism are flying about. Few are really conscious about the logistics and the energy required to put ecological knowledge into practice. The aim of this small book is to bring within the reach of educated laymen, both the science as well as the philosophy of Ecology in simple and n
