#### Sommario/riassunto

Neoplastic Lesions of the Skin presents the full gamut of key inflamed skin disorders entities and diagnoses that a pathologist can expect to encounter in daily practice. Coverage includes inflammatory reactions limited to the epidermis, inflammatory reactions of the dermis, inflammatory reactions of subcutaneous tissue, infectious diseases, cutaneous and metabolic disorders and more. Neoplastic Lesions of the Skin is highly illustrated throughout and provides a handy summary and quick reference guide for pathology residents and less experienced pathologists. In addition, it serves as a portab
