Sommario/riassunto	"Addressed to both in-training and established radiologists and clinicians, Musculoskeletal MRI Structured Evaluation: How to Practically Fill the Reporting Checklist, written by experts in musculoskeletal imaging, offers the structured checklists for interpreting and reporting musculoskeletal MRI examinations. It describes the "how to" of using these templates and incorporating them into the clinical practice. Each chapter is dedicated to a separate joint or specific group of entities, and includes the reporting template along with a step-by-step description and imaging examples of the entire spectrum of the corresponding pathology"--Provided by publisher.
