Thompson and Sarah Pinder -- Psychological aspects / Belinda Hacking -- Carcinoma in situ and patients at high risk of breast cancer / Nigel Bundred -- Breast reconstruction / Cameron Raine and E.M. Weiler-Mithoff.
Sommario/riassunto	The ABC of Breast Diseases provides comprehensive guidance to the assessment of symptoms, and how to manage all common breast conditions and provides guidelines on referral. It covers congenital problems, breast infection and mastalgia, before addressing the epidemiology, prevention, screening and diagnosis of breast cancer. It

outlines the treatment and management options for breast cancer within different groups and includes new chapters on the genetics, prevention, management of high risk women and the psychological aspects of breast diseases. -- Publisher
