Sommario/riassunto	In The Protection of Indigenous Peoples and Reduction of Forest Carbon Emissions , Handa Abidin identifies three main approaches that can be used by indigenous peoples to protect their rights in the context of REDD-plus. Further, he discusses how the available protection for indigenous peoples in the context of REDD-plus is currently insufficient to quickly address cases where the rights of indigenous peoples have been violated through REDD-plus activities. Abidin recommends the establishment of a committee and a panel on REDD-plus that could convey greater benefits to the context of REDD-plus and indigenous peoples, as well as to wider contexts such as climate change, human rights, and international law.
