

1. Record Nr.	UNINA9910813083903321
Autore	Winch Graham
Titolo	Managing construction projects [[electronic resource]] : an information processing approach / / Graham M. Winch
Pubbl/distr/stampa	Chichester ; ; Ames, Iowa, : Blackwell Pub., 2010
ISBN	1-283-85854-1 1-4443-1469-6
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (541 p.)
Disciplina	624.068 690.068
Soggetti	Building - Planning Building - Superintendence Communication of technical information
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Contents; Preface to 1st Edition; Part I Introduction; Chapter 1 The Management of Construction Projects; Chapter 2 The Context of Construction Project Management; Part II Defining the Project Mission; Chapter 3 Deciding What the Client Wants; Chapter 4 Managing Stakeholders; Part III Mobilising the Resource Base; Chapter 5 Forming the Project Coalition; Chapter 6 Motivating the Project Coalition; Chapter 7 Managing the Dynamics of the Supply Chain; Part IV Riding the Project Life Cycle; Chapter 8 Minimising Client Surprise; Chapter 9 Defining Problems and Generating Solutions Chapter 10 Managing the BudgetChapter 11 Managing the Schedule; Chapter 12 Managing Conformance; Chapter 13 Managing Uncertainty and Risk on the Project; Chapter 14 Managing the Project Information Flow; Part V Leading the Project Coalition; Chapter 15 Designing Effective Project Organisations; Chapter 16 Infusing the Project Mission; Chapter 17 Conclusions: Managing Construction Projects Consummately; References; People Index; Project Index; Subject Index
Sommario/riassunto	Project management is of critical importance in construction, yet its execution poses major challenges. In order to keep a project on track, decisions often have to be made before all the necessary information is

available. Drawing on a wide range of research, *Managing Construction Projects* proposes new ways of thinking about project management in construction, exploring the skills required to manage uncertainty and offering techniques for thinking about the challenges involved. The second edition takes the information processing perspective introduced in the first edition and develop
