Teresa S. Encarnacion Tadem.

Sommario/riassunto

Health patterns in Southeast Asia have changed profoundly over the past century. In that period, epidemic and chronic diseases, environmental transformations, and international health institutions have created new connections within the region and the increased interdependence of Southeast Asia with China and India. In this volume leading scholars provide a new approach to the history of health in Southeast Asia. Framed by a series of synoptic pieces on the "Landscapes of Health" in Southeast Asia in 1914, 1950, and 2014 the essays interweave local, national, and regional perspectives. They
