Autore	Bartlett David <1958->
Titolo	Essentials of positioning and location technology // David Bartlett, Omnisense, Cambridge [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2013
ISBN	1-107-34143-4 1-107-23432-8 1-107-34881-1 1-107-35730-6 1-107-34768-8 0-511-84386-0 1-107-34518-9 1-299-40331-X 1-107-34393-3
Descrizione fisica	1 online resource (vii, 204 pages) : digital, PDF file(s)
Collana	The Cambridge wireless essentials series
Classificazione	TEC061000
Disciplina	910.285
Soggetti	Location-based services Mobile geographic information systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Machine generated contents note: 1. Introduction to location; 2. Coordinate systems; 3. Satellite positioning (GNSS); 4. Radiolocation technologies; 5. Inertial navigation; 6. Other techniques and hybrid systems; 7. Techniques and performance; 8. When things go wrong; 9. Location based services and applications; 10. A brief look at the future.
Sommario/riassunto	Mystified by locating and positioning technologies? Need to get the best from your location system? This guide is invaluable for understanding how the positions and movements of objects can be measured and used for real-world applications. From it, you'll learn how to optimise and manage system performance by working with parameters such as velocity, orientation, time, proximity and direction, and consider not only accuracy, but also reliability, integrity, response time and uncertainty. Packed with practical examples, this concise book

gives you an overview of terrestrial radiolocation techniques, including comparative system architectures and real-world performance and limitations. It describes inertial navigation principles and techniques, including low-cost MEMS sensors for consumer products, and a range of applications, such as those benefiting from hybrid positioning techniques.
