Note generali	Includes indexes.
Nota di bibliografia	Includes bibliographical references and indexes
Nota di contenuto	Part I. Realignment -- Part II. God is with us -- Part III. Being with -- Part IV. Explorations -- Part V. Implications.
Sommario/riassunto	A Nazareth Manifesto is an eloquent and impassioned ecumenical proposal for re-envisioning Christianity's approach to social engagement away from working for the people to being with them. Questions the effectiveness of the current trend of intervention as a means of fixing the problems of people in distressed and disadvantaged circumstances. Argues that Jesus spent 90% of his life simply being among the people of Nazareth, sharing their hopes and struggles, therefore Christians should place a similar emphasis on being alongside people in need rather than hastening to impose solutions. Written by a respected priest and broadcaster and renowned Christian ethicist and preacher. Supported by historical, contemporary, exegetical and anecdotal illustrations.

Sommario/riassunto

The 12 member nations of the European Economic Community (EC) are engaged in a bold effort to create a Single European Market by the end of 1992. The changes brought about by European market integration will have a major impact on U.S. industry. Although proponents of the plan argue that it will benefit businesses by allowing economies of scale, more efficient marketing, and increased demands for goods and services from outside the Community, there is some concern that the Single European Market may serve to exclude or limit participation of non-European competition. The impact is likely to be particularly pronounced in industries with heavy involvement in research and development. This volume is based on a major two-day symposium which brought together officials of United States and other governments, industry representatives, and academic experts to examine EC policies on technical standards, intellectual property rights, access to the results of EC-supported basic research, and other issues affecting R&D intensive firms.
