Sommario/riassunto	Contemporary scholars have sharply disagreed over the importance of the loquacious women of Liber Antiquitatum Biblicarum . Using the methods of contemporary Cognitive Linguistics, Ideology and Metaphor develops a systematic, replicable reading of the text and its characters, showing how Pseudo-Philo uses these women's stories to articulate the

text's theology and ideology. The analysis also explores how the author redefines the term «mother» in order to sanction the female authority to interpret and instruct. The conceptual blends that compose the text's distinctive and sometimes dissonant metaphors are analyzed in detail. This monograph also explores how a re-written Bible establishes its authority and awards authority to specific characters and how rhetorical and narrative methodologies fit within cognitive linguistics.
