Sommario/riassunto	This book situates information technology at the centre of public policy and management. IT is now a vital part of any government organisation, opening new policy windows and enabling a vast range of tasks to be carried out faster and more efficiently. But it has also introduced new problems and challenges. Four in-depth case studies demonstrate how information systems have become inextricably linked with the core tasks of governmental organisations. The key government

departments examined are:* the Inland Revenue Service and Social Security Administration in the US* the Inland Revenue
