

1. Record Nr.	UNINA9910813371703321
Autore	Tange R. A
Titolo	The history of otosclerosis treatment : a survey of more than a century's search for the best treatment of the disease // R.A. Tange
Pubbl/distr/stampa	Amsterdam, The Netherlands : , : Kugler Publications, , [2014] ©2014
ISBN	90-6299-864-X
Descrizione fisica	1 online resource (160 p.)
Disciplina	617.8/82
Soggetti	Otosclerosis Otology - History Ear - Diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Table of Contents; Foreword; Preface; Introduction; 1. Early history of stapes fixation and otosclerosis; 2. Early conservative and surgical treatments of otosclerosis; Non-surgical treatment of otosclerosis; 1. Medical treatment of otosclerosis; 1.1. Treatment of the endocrine system for retardation of the otosclerosis process; 1.2. Sex hormones and treatment of otosclerosis; 1.3. Cortisone treatment in otosclerosis; 1.4. Fluoride therapy; 1.5. Bisphosphonate treatment; 2. Alternative well-meant therapies and advices; 2.1. Advices; 2.2. Ayurveda and otosclerosis 3. X-ray treatment of otosclerosis 4. Re-education machines; 4.1. Kinesiphone; 4.2. Zund-Burguet electrophonoid; 5. Hearing aids and otosclerosis; Treatment of otosclerosis and pregnancy; 1. Pregnancy and otosclerosis; 2. Eugenics and otosclerosis; 3. Sterilization and artificial abortus and otosclerosis; Surgical treatment of otosclerosis; 1. Alternative surgical approach for otosclerosis; 1.1. Wittmaack theory and treatment of otosclerosis; 1.2. Raising of the dura mater as treatment for otosclerosis; 2. Fenestration of the labyrinth 2.1. The development of the fenestration surgery as treatment for otosclerosis 2.2. Fenestration operation; 2.2.1. Fenestration according to Maurice Sourdille; 2.2.2. Fenestration according to Julius Lempert; 2.2.3. Fenestration according to Oswald Otto Popper; 3. Mobilization of

the stapes and stapediolysis; 3.1. Stapes mobilization; 3.2. Stapediolysis; 4. Stapedectomy and stapedotomy; 4.1. Stapedectomy; 4.2. Small-hole stapedotomy; 4.3. Laser stapes surgery; 4.4. Stapes prostheses; Treatment of cochlear otosclerosis; 1. Histology on cochlear otosclerosis
2. Radiological investigation for cochlear otosclerosis
3. Treatment of sensorineural deafness due to cochlear otosclerosis; 4. Cochlear implantation in far-advanced cochlear otosclerosis; Final remarks; About the author; References

Sommario/riassunto

Preface
Hearing loss due to otosclerosis has been a subject of many different treatments. Since the understanding at the end of the nineteenth century that the disease was located in and around the cochlea and that it produces conducting and also perceptive hearing loss, all kinds of medical as well as surgical treatments have been applied to cure the disease. Most of the treatments have fallen into oblivion after the successful introduction of the stapedectomy in the late fifties of the last century. This book tries to highlight almost all possible treatments for otosclerosis presented in literature
