

1. Record Nr.	UNINA9910813374003321
Titolo	Urban water in Japan // edited by Rutger de Graaf, Fransje Hooimeijer
Pubbl/distr/stampa	London ; ; New York, : Taylor & Francis, c2008
ISBN	0-429-17873-5 1-4822-6622-9 1-134-05268-5 1-281-72410-6 9786611724108 0-203-88919-3
Edizione	[First edition.]
Descrizione fisica	1 online resource (244 p.)
Collana	Urban water series ; ; v. 11
Altri autori (Persone)	GraafRutger de HooimeijerFransje
Disciplina	363.610952 627.0952
Soggetti	Flood control - Japan Municipal water supply - Japan Urban runoff - Japan - Management Water resources development - Japan
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front cover; Contents; List of tables; Chapter 1. Introduction; Chapter 2. History of urban water in Japan; Chapter 3. Historical floods with responding flood control; Chapter 4. The development of river management: Tone River; Chapter 5. Urban flood control on the rivers of Tokyo metropolitan; Chapter 6. Stormwater management and multi source water supply in Japan: Innovative approaches to reduce vulnerability; Chapter 7. Development of lowland areas; Chapter 8. Parallel planning approach for urban water management; Chapter 9. Challenges for delta areas in coping with urban floods ReferencesIndex; Back cover
Sommario/riassunto	"Water control is essential to Japan, as more than half of its invested capital is concentrated in elevations under sea level and the majority of the island nation is exceptionally vulnerable to flooding. To avoid

potential crisis, the Japanese have developed exceptionally innovative water management practices. Offering the unique perspective of Dutch engineers, considered the worlds most progressive urban water experts, this volume provide a detailed look at how Japan has developed its modern water system. It looks at the system of Tokyo city, discusses river management practices and urban flood control throughout the country, and considers the impact that these innovations have had on delta regions."--Provided by publisher.
