Sommario/riassunto	Global Terrorism and New Media carefully examines the content of terrorist websites and extremist television programming to provide a comprehensive look at how terrorist groups use new media today. Based partly on a content analysis of discussion boards and forums, the authors share their findings on how terrorism 1.0 is migrating to 2.0 where the interactive nature of new media is used to build virtual organization and community. Although the creative use of social

networking tools such as Facebook may advance the reach of terrorist groups, the impact of their use of new med

Sommario/riassunto

How can developing countries maximize some of the beneficial rules and policies provided to them by the EU and international organizations to reduce public health plight in terms of inadequate access to medicines and vaccines? By navigating some of the complex European and international rules and policies that have hitherto been put in place to ease access to affordable healthcare, the author identifies ways in which policy makers and legislators can optimally use extant rules to enhance healthcare provision.
