Sommario/riassunto	This e-book deals with aspects of culture and career development in hospitality and tourism management. Many studies have assumed the importance of cultural values and/or personality in the service orientation of individuals. The findings presented here, however, emphasize the importance of training and development in preparing individuals to give service. This is heartening to the industry, which faces increasing challenges through globalization and immigration. From these studies it seems that not only can the predisposition to service as a whole be fostered by training, but also front line staff's orientation towards particular styles and standards of service. This is good news for any organization that wishes to respect and manage its multicultural work force.

Rubinoff -- Music and May 1968 in France : practices, roles, representations / Eric Drott.

---

Sommario/riassunto

Music was integral to the profound cultural, social and political changes that swept the globe in 1968. This collection of essays offers new perspectives on the role that music played in the events of that year, which included protests against the ongoing Vietnam War, the May riots in France and the assassination of Martin Luther King, Jr. From underground folk music in Japan to antiauthoritarian music in Scandinavia and Germany, *Music and Protest in 1968* explores music's key role as a means of socio-political dissent not just in the US and the UK but in Asia, North and South America, Europe and Africa. Contributors extend the understanding of musical protest far beyond a narrow view of the 'protest song' to explore how politics and social protest played out in many genres, including experimental and avant-garde music, free jazz, rock, popular song, and film and theatre music.
