

1. Record Nr.	UNINA9910813935203321
Autore	Gomez Jorge Marx
Titolo	Information technologies in environmental engineering / / Jorge Marx Gomez
Pubbl/distr/stampa	Bradford, England, : Emerald Group, 2004
ISBN	1-280-51544-9 9786610515448 1-84544-404-3
Edizione	[1st ed.]
Descrizione fisica	1 online resource (124 p.)
Collana	Management of Environmental Quality. No. 3 ; ; Vol. 15
Disciplina	628
Soggetti	Environmental engineering Information technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	CONTENTS; EDITORIAL REVIEW BOARD; Abstracts and keywords; Editorial; Mapping arable soils using GIS-based soil information database in Kuwait; An agent-based intelligent environmental monitoring system; Decision support for optimal emission reduction; Automated generation of environmental reports with Umberto; Problem-solving environment for flood forecasting; Manage data - manage hazards Development of urban hazard information infrastructure for the city of Windhoek, Namibia; Universal system for diagnosing environmental noise ILMAX: a system for managing experience knowledge in a long-term study of stream ecosystem regeneration An application of ecological informaticsSystemic data management for mathematical modelling of environmental problems; News from the Net; News; Books and resources; Diary; Feature
Sommario/riassunto	A soil information system was developed to manage soil survey data and to ensure that soil information is readily available to support land use planning and development. The Soil Information System combined spatial information management of a Geographical Information System (GIS) with the textural information management of a relational database management system. The GIS is capable of manipulating and displaying

area and point data with the logical framework of a database to store data for interpretation. The main objective of this paper was to demonstrate one of the approaches to utilize and
