

1. Record Nr.	UNINA9910813979203321
Autore	Blasone Massimo
Titolo	Quantum field theory and its macroscopic manifestations [[electronic resource]] : Boson condensation, ordered patterns and topological defects // Massimo Blasone, Petr Jizba & Giuseppe Vitiello
Pubbl/distr/stampa	London, : Imperial College Press, 2011
ISBN	1-283-14817-X 9786613148179 1-84816-281-2
Descrizione fisica	1 online resource (545 p.)
Altri autori (Persone)	JizbaPetr VitielloGiuseppe
Disciplina	530.14/3
Soggetti	Quantum field theory Quantum theory Crystals Ferromagnetism Superconductors
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface; Contents; 1. The structure of the space of the physical states; 2. Inequivalent representations of the canonical commutation relations; 3. Spontaneous breakdown of symmetry and the Goldstone theorem; 4. Dynamical rearrangement of symmetry and macroscopic manifestations of QFT; 5. Thermal field theory and trajectories in the space of the representations; 6. Selected topics in thermal field theory; 7. Topological defects as non-homogeneous condensates. I; 8. Topological defects as non-homogeneous condensates. II; 9. Dissipation and quantization 10. Elements of soliton theory and related conceptsBibliography; Index
Sommario/riassunto	This book is a self-contained presentation of the quantum field theory of topological defects created during spontaneous symmetry breakdown phase transitions, with a particular emphasis on phenomenological issues of current interest.
