

1. Record Nr.	UNINA9910814092303321
Titolo	Energy from the sea : an international law perspective on ocean energy // edited by Nigel Bankes, Seline Trevisanut
Pubbl/distr/stampa	Leiden ; ; Boston : , : Brill Nijhoff, , [2015]
ISBN	90-04-30352-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (187 pages)
Altri autori (Persone)	BankesNigel <1956-> TrevisanutSeline
Disciplina	343.09/24
Soggetti	Ocean energy resources - Law and legislation Conference papers and proceedings.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Papers resulting from a workshop held February 19-20, 2014 in Utrecht, Netherlands. "Originally published as Volume 29, No. 4 (2014) of Brill's journal International journal of marine and coastal law"--Title page verso.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preliminary Material -- Energy from the Sea: Introduction / Nigel Bankes and Seline Trevisanut -- 1 Energy Sovereignty in Marine Spaces / Richard Barnes -- 2 Mind the Gap in the gairs: The Role of Other Instruments in losc Regime Implementation in the Offshore Energy Sector / Catherine Redgwell -- 3 Energy from the Sea and the Protection of the Marine Environment: Treaty-Based Regimes and Ocean Corporate Social Responsibility / Angelica Bonfanti and Francesca Romanin Jacur -- 4 The Role of Private Actors in Offshore Energy: Shifting Models of Participation / Seline Trevisanut -- 5 Recent Framework Agreements for the Recognition and Development of Transboundary Hydrocarbon Resources / Nigel Bankes -- 6 Harnessing Offshore Wind Energy: Legal Challenges and Policy Conundrums in the European Union / Ronán Long -- 7 Regulating Offshore Energy Sources in the North Sea—Reinventing the Wheel or a Need for More Coordination? / Hannah Katharina Müller and Martha M. Roggenkamp -- Index.
Sommario/riassunto	One of the main challenges of our time is to be able to guarantee energy supply at a reasonable price. Policy makers, international institutions and the private sector increasingly look to the oceans as a

significant source of energy. The Law of the Sea provides the legal framework within which any maritime activity is performed and strikes a balance between the multiple activities that can take place simultaneously in the same maritime zone. This volume addresses some of the main legal challenges raised by the expansion of the ocean energy sector and its consequences for the relevant international normative and institutional framework. Some of the major themes explored include energy sources and the competition for marine space, energy security, private actors and corporate social responsibility, fragmentation or integration, evolution and reinforcement of international law and liability.
