Nota di bibliografia Includes bibliographical references and index. FROM 'SCIENCE IN THE MAKING' TO UNDERSTANDING THE NATURE OF Nota di contenuto SCIENCEAn Overview for Science Educators: Copyright; Contents: Preface; Acknowledgments; 1 Introduction; 2 'Science in the Making' and Heuristic Principles in a Historical Context: 3 Students' and Teachers' Understanding of the Nature of Science; 4 How to Introduce the Nature of Science in the Classroom; 5 The Role of Heuristic Principles in Understanding the Nature of Science; 6 How the Views of Leon Cooper (Nobel Laureate) can Influence In-service Teachers' Understanding of the Nature of Science 7 Martin Perl's (Nobel Laureate) Perspective on the Nature of Science and Teaching Science8 Conclusion: From 'Science in the Making' to Understanding the Nature of Science; References; Index Sommario/riassunto "The Nature of Science is highly topical among science teacher educators and researchers. Increasingly, it is a mandated topic in state curriculum documents. This book draws together recent research on Nature of Science studies within a historical and philosophical framework suitable for students and teacher educators. Traditional science curricula and textbooks present science as a finished product.

Taking a different approach, this book provides a glimpse of "science in the making" -- scientific practice imbued with arguments, controversies, and competition among rival theories and explanations" -- Provided by publisher.
