Sommario/riassunto	Freedom of expression and tolerance are considered core features of our democracy. Free speech was at the centre of a recent controversial debate in federal politics regarding proposed changes to the Racial Discrimination Act to remove the words "offend, insult, humiliate" from section 18C, and replace them with the word "harass". The race hate debate is explored in depth through a range of opinions presented in this book. How is free speech justified in Australia, and what laws are in place to protect people from defamation and discrimination such as racial vilification? Which speech deserves special protections; should some speech acts be punished? When does the right to freedom of expression become a right to offend? Is free speech at risk in Australia, or is the balance right?

Sommario/riassunto	Annotation Japan's financial institutions and policy underwent remarkable change in the past decade. The country began the 1990s with a heavily regulated financial system managed by an unchallenged Ministry of Finance and ended the decade with a Big Bang financial market reform, a complete restructuring of its regulatory financial institutions, and an independent central bank. These reforms have taken place amid recession and rising unemployment, collapsing asset prices, a looming banking crisis, and the lowest interest rates in the industrial world. This book analyzes how the bank-dominated financial system--a key element of the oft-heralded "Japanese economic model" --Broke down in the 1990s and spawned sweeping reforms. It documents the sources of the Japanese economic stagnation of the 1990s, the causes of the financial crisis, the slow and initially limited policy response to banking problems, and the reform program that

followed. It also evaluates the new financial structure and reforms at the Bank of Japan in light of the challenges facing the Japanese economy. These challenges range from conducting monetary policy in a zero-interest rate environment characterized by a "liquidity trap" to managing consolidation in the Japanese banking sector against the backdrop of increasing international competition.
