Sommario/riassunto	"To receive the LEED AP Homes credential, professionals in residential design and construction need to take the LEED AP Homes exam and demonstrate advanced knowledge in green building practices. This book provides architects, interior designers, and home builders with a clearly organized study guide to this exam. Authored by an expert who teaches seminars on LEED exam prep, this guide stands out from the competition in its engaging style and stimulating approach, featuring sample quizzes, more than 100 sample flashcards, and many drawings, charts, and diagrams to illustrate concepts throughout"--
