## Sommario/riassunto

Taking its cue from the 90th anniversary commemorations of November 2008, this work explores the relationship between state and nationhood during the three phases to date in Latvia's existence as a territorial entity: the sovereign statehood of 1918-1940; the Soviet and Nazi occupations of 1940-1944 and the ensuing half-century within the USSR; and the post-1991 period, which has seen the restoration of independence on the basis of legal continuity from the inter-war period and – latterly – accession to the European Union. The aim in relation to all three eras is to go beyond the often essentialising contours of Cold War and post-Cold War debates and reveal the underlying complexities and ambiguities of political and social development.

## Sommario/riassunto

Defining Excellence in Simulation Programs is an official publication of the Society for Simulation in Healthcare (SSH), created to support the Society's mission to encourage excellence in healthcare education, practice and research through the use of simulation. With nearly 140 expert clinicians and educators contributing, this authoritative guide offers clear-cut definitions, recommendations and best practices for all types of simulation training programs. This is a must-read for healthcare managers, educators and researchers looking to create or manage successful, cost-effective, researched
