Sommario/riassunto	Best-selling author Peter Kreeft presents a series of brilliant essays about many of the issues that increasingly divide our Western civilization and culture. He states that these essays are not new proposals or solutions to today's problems. They are old. They have been tried, and have worked. They have made people happy and good. That is what makes them so radical and so unusual today. The most uncommon thing today is common sense. Kreeft presents relevant, philosophical data that can guide us, divided into 7 categories: epistemological, theological, metaphysical, anthropological, ethical, political, and historical. He then explores these categories with classic

Kreeft insights, presenting 40 pithy points on how we can implement the data from these categories to help save civilization;and more importantly, save souls.
