

1. Record Nr.	UNINA9910814503103321
Autore	Bennett Andrew F. <1945->
Titolo	Inverse modeling of the ocean and atmosphere // Andrew F. Bennett
Pubbl/distr/stampa	Cambridge, UK ; ; New York, : Cambridge University Press, 2002
ISBN	1-107-12579-0 1-280-43646-8 0-511-17688-0 0-511-04244-2 0-511-15778-9 0-511-32359-X 0-511-53589-9 0-511-04554-9
Edizione	[1st ed.]
Descrizione fisica	1 online resource (xxii, 234 pages) : digital, PDF file(s)
Disciplina	551.46/001/5118
Soggetti	Oceanography - Mathematical models Meteorology - Mathematical models Inverse problems (Differential equations)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references (p. 186-194) and indexes.
Nota di contenuto	1. Variational assimilation -- 2. Interpretation -- 3. Implementation -- 4. The varieties of linear and nonlinear estimation -- 5. The ocean and the atmosphere -- 6. Ill-posed forecasting problems. App. B. Euler-Lagrange equations for a numerical weather prediction model.
Sommario/riassunto	Inverse Modeling of the Ocean and Atmosphere is a graduate-level book for students of oceanography and meteorology, and anyone interested in combining computer models and observations of the hydrosphere or solid earth. A step-by-step development of maximally efficient inversion algorithms, using ideal models, is complemented by computer codes and comprehensive details for realistic models. Variational tools and statistical concepts are concisely introduced, and applications to contemporary research models, together with elaborate observing systems, are examined in detail. The book offers a review of

the various alternative approaches, and further advanced research topics are discussed. Derived from the author's lecture notes, this book constitutes an ideal course companion for graduate students, as well as being a valuable reference source for researchers and managers in theoretical earth science, civil engineering and applied mathematics.
