Nota di contenuto	pt. I. The importance of finance in emerging market economies -- pt. II. Domestic finance and policies in emerging markets -- pt. III. International finance in emerging markets -- pt. IV. Describing financial systems in emerging regions of the world -- pt. V. Conclusions.
Sommario/riassunto	Emerging market economies have accounted for three quarters of world economic growth and more than half of world output over the last decade. But the energy and ideas inherent in emerging economies cannot generate growth by themselves without resources to support them - and first among these resources is money which is needed to purchase the capital and knowhow that turn ideas and initiative into income. How do emerging economies rich in resources other than money get money? This question encapsulates what emerging market finance is all about, and why finance is absolutely crucial
