Record Nr. UNINA9910814639303321 Titolo Handbook of biologically active peptides / / edited by Abba J. Kastin San Diego, Calif., : Elsevier, 2013 Pubbl/distr/stampa San Diego, Calif.:,: Academic Press,, 2013 0-12-385096-7 **ISBN** Edizione [2nd ed.] 1 online resource (liii, 1942 pages, 36 unnumbered pages of plates): Descrizione fisica illustrations (some color) Collana Gale eBooks Disciplina 572.65 612.015756 Soggetti **Peptides** Peptide hormones Hormones Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Note generali Description based upon print version of record. Nota di bibliografia Includes bibliographical references and index. Nota di contenuto section I. Plant peptides / Yoshikatsu Matsubayashi -- section II. Bacterial/antibiotic peptides / Robert E.W. Hancock -- section III. Fungal peptides / Tzi Bun Ng -- section IV. Invertebrate peptides / Ronald J. Nachman -- section V. Amphibian/skin peptides / J. Michael Conlon -- section VI. Venom peptides / Jean-Marc Sabatier -- section VII. Cancer/anticancer peptides / Terry Moody -- section VIII. Vaccine peptides / Pravin T.P. Kaumaya -- section IX. Immune/inflammatory peptides / Joost Oppenheim -- section X. Brain peptides / Hubert Vaudry -- section XI. Edocrine peptides / Ludwik Malendowicz -section XII. Ingestive peptides / Stephen C. Woods -- section XIII. Gastrointestinal peptides / Yvette Tache -- section XIV. Cardiovascular peptides / Kazuhiro Takahashi -- section XV. Renal peptides / Willis K. Samson -- section XVI. Respiratory peptides / Sami Said -- section XVII. Opiate peptides / Fred Nyberg -- section XVIII. Neurotrophic peptides / Illana Gozes -- section XIX. Blood-brain peptides / Weihong Pan -- section XX. Peptide biosynthesis/processing / Naoto Minamino -- section XXI. General peptide topics / Abba J. Kastin. Sommario/riassunto Handbook of Biologically Active Peptides, Second Edition, is the

definitive, indispensable reference for peptide researchers,

biochemists, cell and molecular biologists, neuroscientists, pharmacologists, and endocrinologists. Its chapters are designed to be a source for workers in the field and enable researchers working in a specific area to examine related areas outside their expertise. Peptides play a crucial role in many physiological processes, including actions as neurotransmitters, hormones, and antibiotics. Research has shown their importance in such fields as neuroscience, immunology, pharmacology, and cell biology. The Handbook of Biologically Active Peptides presents, for the first time, this tremendous body of knowledge in the field of biologically active peptides in one single reference. The section editors and contributors represent some of the most sophisticated and distinguished scientists working in basic sciences and clinical medicine. The Handbook of Biologically Active Peptides is a definitive, all-encompassing reference that will be indispensable for individuals ranging from peptide researchers, to biochemists, cell and molecular biologists, neuroscientists, pharmacologists, and to endocrinologists. Chapters are designed to be a source for workers in the field and will enable researchers working in a specific area to examine other related areas with which they would not ordinarily be familiar"--Publisher's description.
