Autore	Poisel Richard
Titolo	Introduction to communication electronic warfare systems // Richard Poisel
Pubbl/distr/stampa	Boston, MA, : Artech House, c2002
ISBN	9781580535534 1-58053-553-4
Edizione	[1st ed.]
Descrizione fisica	1 online resource (572 p.)
Collana	Artech House information warfare library
Disciplina	355.3/43 623.73 355.343
Soggetti	Military telecommunication Information warfare Computer networks - Security measures Electronics in military engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.

### Sommario/riassunto

Annotation This comprehensive engineering-level resource provides you with an excellent introduction to electronic warfare (EW) for communication systems. Extensively referenced with over 600 equations, it details the components, systems, and operations of electronic warfare systems dedicated to protecting and attacking military communications networks. You are provided with a complete understanding of how modern direction finders for communication signals work, along with their limitations.
