Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	part I. Theoretical foundations -- part II. Methodological frontiers.
Sommario/riassunto	This book brings together key scholars and practitioners from a range of fields in order to advance epidemiological and gerontological research into the role of religion in physical, psychosocial and mental health. Part One addresses such issues as hope, forgiveness, the psychodynamics of faith and belief, and coping in a theoretical context. Part Two seeks to advance the methodological sophistication of research in this area, with an emphasis on measurement and design issues.
